

BaseRun Lines at $\frac{3}{4}$ "

Sconce Lines at $5\frac{1}{2}$ "

Lines around Door or Windows at $\frac{1}{2}$ "

The Layout Stick has all these dimensions.

Some lines may be easier to draw before Dividers are installed.

Install Dividers

Dividers can't be moved after they are wired... if you don't know where they are going and must wire the house now, leave out the Divider and wire it in later (it's not as easy or as robust as what is shown here, though).
