

25A. Glue, tape, and weight the Porch Floor to the Porch Foundation and the house, centered side-to-side.

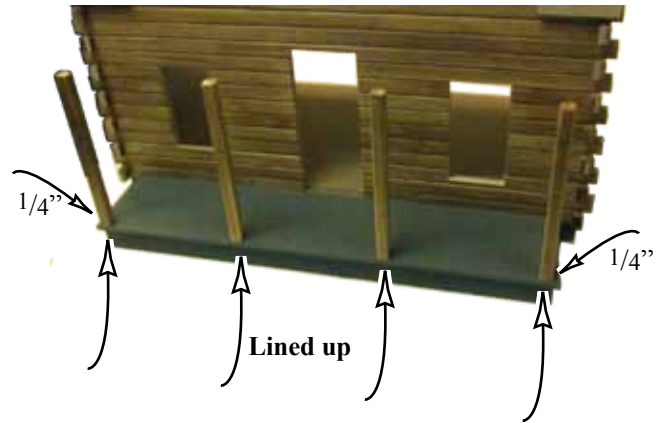

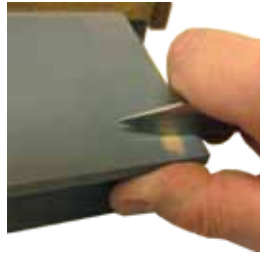

Let the glue dry.

B. Set up the Porch Posts lined up with the front edge of the Porch Floor, 1/4" from each side, and spaced evenly (6 1/4").

Mark the Posts' positions and scrape a bare spot within the marks for glue.

C. Glue the Posts at the marks, straight and square.

Let the glue dry.

26A. Cut two pieces of Porch Facia from a 10 17/32" Log, one with the angles facing right (rounded face up on this diagram), one facing left (rounded face down).

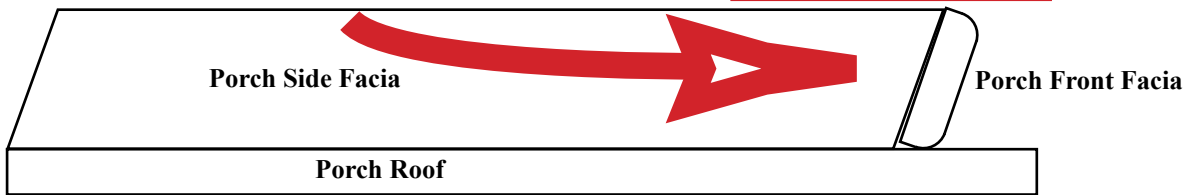

26B. Cut a Front Facia 2 1 1/2 from a long log. Glue and tape the Side Facia to the Front Facia, square and lined up on the ends. Let the glue dry.

C. Glue and weight the Porch Facia set to the bottom of the Porch Roof, spaced evenly at the sides and front

4 5/8 on the edge

A copy of each cutting diagram is on the last page

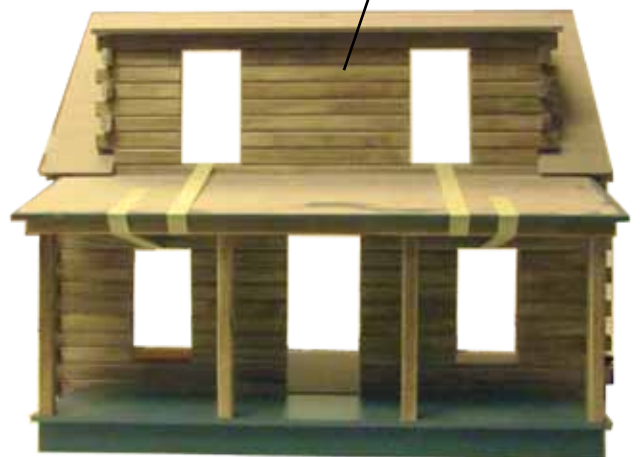

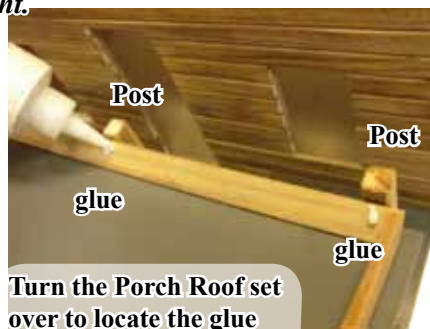

**Here**

27. Glue and tape the Porch Roof Set to the house and Posts. Put a double twist in the tape used to hold the Posts to the Roof (make it look like a 'bow tie') to pull the Posts tight to the Front Facia.

**Check that the Posts are straight.**

Let the glue dry.

**Bow Tie**
