

Kit #6800 Parts Measurements are approximate and are for identification purposes only

- 2 Door, Interior [U1015] includes back trim
- 2 Door Top (Divider Extension) $[\frac{3}{8}] 1\frac{15}{16} \times 3\frac{1}{16}$
- 2 Door Back (Divider Extension) $[\frac{3}{8}] 9 \times 1\frac{13}{16}$

The Divider Extensions are installed in the finished dollhouse before wallpaper, flooring, or crown molding.

Glue together the Door Top and Door Back; let the glue dry.

Glue the Door Back/Door Top to the Divider (in the house) and to the floor and ceiling, lined up with the Divider at the top and bottom (use a straight-edge to line them up from-front-to-back)

Pull the top and bottom pins to disassemble the Door for painting. Tape the pins to the bottom of the thresholds so they won't get lost.

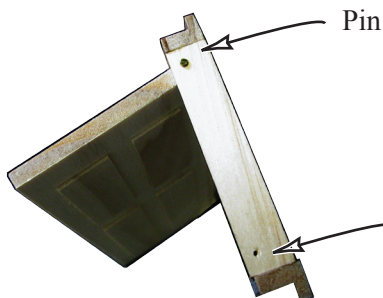

Paint the Doors, Frames, and Trim; re-assemble the Doors

Complete the interior finishing (paint, wallpaper, flooring, etc).

Install the Door and Back Trim

Door from the top

The door frame is drilled for either left or right swing. When you re-assemble your door after painting, use the hole that lets your door swing the best way for your interior plan.
